

# KDS Digital Signage Player

The KDS Digital Signage Player helps you to enhance communication by delivering eye-catching infotainment.

With this all-in-one solution, you can create your own unique digital channel and run it on screen, freely combining lively advertising, presentations, web sites, RSS feeds and streamed content. The reasonably priced KDS Digital Signage Player is equally suitable as cost-efficient stand-alone solution as well as for large, web controlled advertising networks.

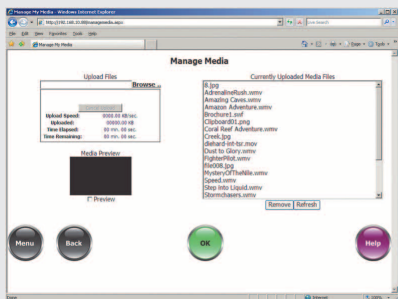

## Top Features

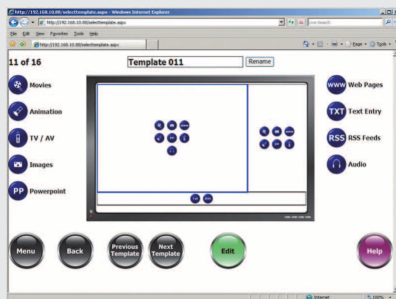

- » Comfortable plug-and-play solution
- » Easy to operate
- » Simple and intuitive user interface
- » Pre-designed display templates facilitate the creation of your own Digital Signage program by combining various content such as promotional spots, customer information, third-party advertising, news or weather forecasts
- » Easy design of individual display templates for maximum flexibility
- » For stand-alone installations or fully networked solutions
- » Remote control via web browser possible
- » Supports a large variety of content formats:
  - Still and moving images
  - Videos
  - Flash animation
  - Ticker tape messages
  - PowerPoint presentations
  - Streamed images
  - Websites
  - RSS
  - Optional live TV feeds
  - 5.1 audio playback

## Specifications:

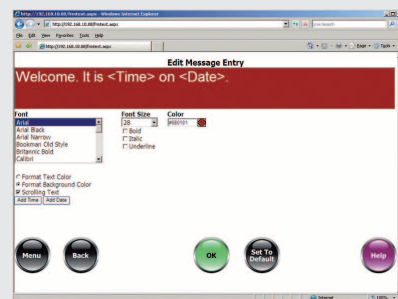

- Motherboard:** BIOSTAR TA780G M2+
- CPU:** AMD Socket AM2 Athlon TM 64 x2 x 250
- Chipset:** AMD ® 780Gb
- Memory:** 1GB, DDR3 RAM, 4 x DDR3 DIMM Memory Slot (Max 4GB)
- Graphics Controller:** Integrated in ATI Radeon HD3200 Chipset, supports all common resolutions up to 1920x1080 including 720p, 1080i and 1080p
- Integrated Video:** ATI Radeon HD3200 GPU, up to 512MB
- LAN (Local Area Network):** Realtek 8168C/8111C on-chip, supports 1 Gbps
- Audio:** ATI 791A Realtek High Definition Audio
- Storage:** 1 x 160 GB 2½" SATA II hard disk drive
- Power:** 100-240 AC Input (Auto switch)
- Connectors:**
  - 1X DVI / HDMI
  - 4X USB
  - 1X VGA
  - 1X RS-232
  - 1x LAN, 10/100/1000
  - 2x Audio 5.1 + HDMI audio output
