360 Degrees of Fascination and Innovation

Litefast MINI

Litefast MINI desktop models are ideal for placing on sales counters or customer service desks, at cash registers or in shop windows. They present text and graphics very attractively, with the transparent display ensuring a tremendous advertising effect. A fine pixel pitch of only one millimeter ensures crisp, clear pictures. Litefast MINI comes in two standard diameters. Different sizes and OEM versions with individual branding campaigns are also available.

Litefast MAGIC

Litefast Magic products are the world's only "see through" video displays. They create a unique holographic look for videos and product presentations. The high-resolution, transparent 360° display generates a self-illuminated, extremely natural-looking image. Litefast MAGIC is also available with an optional showcase integrated in the cylindrical display for exhibiting actual products inside the digital messages. Optional features such as backlighting for the generous poster areas and integrated sound systems additionally enhance the advertising impact.

Litefast MOTION

Litefast MOTION displays are the perfect multimedia platform for any kind of video, commercial or trailer. Their innovative LED display technology delivers a large color space, brilliant colors and excellent contrast, even at brightly lit locations. Generously dimensioned poster areas with optional backlighting and a variety of optional audio systems make all Litefast MOTION versions powerful tools for marketing your product. Litefast MOTION displays come in various sizes with fine pixel pitch resolutions of up to one millimeter for genuine HR images.
